CSS Study Guide With contributions from past Web Design students ☺	Name: **Answer Key**	
	Date:	Period:

1. Create a style that makes all tables have a dashed, blue border, a yellow background and a width of 60% of the page.

```
table {
   border: dashed blue 1px;
   background-color: yellow;
   width: 60%;
}
```

2. What is missing from this?
```
BODY
{
      background-color: red;
      color: #0000ff;
}
```

3. Embedded styles are in the <STYLE> tag, which is a child of the <HEAD> tag, which is a child of the <HTML> tag.

4. What do the letters CSS represent? Cascading Style Sheets

5. What is the difference between text-align and vertical-align?
"text-align" will align content horizontally (left, center, right). "vertical-align" will align text vertically (top, middle, bottom).

6. In what CSS property do you set the text to be bold? font-weight

7. How can you remove the underline in a hyperlink using CSS?

```
A {
   text-decoration: none;
}
```

8. True or **False**. Does blue mean the same as #00FF00?

9. Write the code for a CSS style that has a dashed blue border with a width of 3px.

```
.BlueBorder {
   border: dashed blue 3px;
}
```

10. Which property would you use to change the color of text?
   a. font-color:
   b. text-color:
   c. letter-color:
   d. color:

11. What is the correct way to center text in a style?
   a. text-align: center;
   b. align: center;
   c. font-align: center;
   d. center: align;

12. In order to change the border of <u>all</u> images, which would you use?
   a. IMG {   }
   b. IMAGE {   }
   c. .IMG {   }
   d. IMG.blue {   }

13. Name five CSS properties.

   Any CSS properties will work.
   For example,
   ```
   background-color
   text-align
   font-weight
   border-left
   color
   ```

14. Which tag is used to connect your HTML page to a CSS stylesheet?
   a. <a>
   b. <link>
   c. <vlink>
   d. <connect>

15. What **is** CSS and how is it used?

   CSS is cascading style sheets. It allows you to define styles separately from the content of the page. CSS styles give you more control over the appearance of the page and allow you to reuse your styles quickly and easily from page to page.

16. How do you make an unordered list that uses squares as its bullets?

   Example:
   UL {
          list-style-type: square;
   }

17. Write the code that attaches an external style sheet named "styles.css" to your HTML document.

   ```
   <LINK href="styles.css" type="text/css" rel="stylesheet" />
   ```

18. True or **False**. This is correct CSS code. If false, correct the error.

   ```
   .MyStyle
   {
       color: #7831EF;
       border: 3px͟ solid red;      ←Example correction
   }
   ```

Tim Helland - 12/18/2018

19. Find the error(s) and rewrite the code correctly at the right.

```
MyStyle
{
        Border top: 1px, dashed, blue:
        Border: 2px dashed blue;
        Background_color=red
]
```

```css
.MyStyle {
     border-top: 1px dashed blue;
     border: 2px dashed blue;
     background-color: red;
}
```

20. True or **false**. The CSS selector to select the whole page is ".BODY".

21. True or **false**. CSS is used to add content to the page.

    CSS is used to alter the appearance and layout of the page.

22. Make a CSS style with a red background and underlined, blue font. Also, align the text to the right.

```css
.MyStyle {
     background-color: red;
     color: blue;
     text-align: right;
     text-decoration: underline;
}
```

23. Circle the errors in this CSS code:

```
.TD
(
text-align=center:
text-color=blue;
)
```
